

LOGIC ELEMENTS

SERIES 20

LC* CARTRIDGE VALVES
ISO 7368 - DIN 24342

LP* COVERS

ND 16 - 25 - 32 - 40 - 50 - 63

p max 420 bar

Q max (see table of performances)

OPERATING PRINCIPLE

— Logic elements are cartridge valves suitable for installation in blocks or manifolds. They are available in five different sizes: ND 16 - 25 - 32 - 40 - 50 - 63.

— They are designed to perform complex hydraulic circuits, using functional compact blocks, with high flow rates and low pressure drops.

— They are made of a cartridge valve with ISO7368 / DIN 24342 cavity bore and a control cover (4). The cover includes the cartridge valves pilot lines; some versions are designed for the installation of ISO 4401-03 (CETOP 03) valves, to realise different control functions (see paragraph 8 for diagrams and function descriptions). A low leakage version is also available for sizes 25, 32, 40, 50 and 63 obtained inserting a seal into the seat no. 5.

— The cartridge valves are composed of a jacket (2), a poppet (1), and a closing spring (3). The poppet can either be standard (S) or with a damping nose (D), suitable for a smooth flow control during the valve opening and closing phases.

— There are two different types of cartridge valves available:

- **Q type:** this valve is used for flow and directional control and as a check valve.

The areas involved are:

A_1 - corresponding to the seat diameter area, considered as reference area = 1

A_3 - corresponding to the jacket internal diameter area.

A_2 - corresponding to the difference between $A_3 - A_1$

The area ratio A_1/A_3 is 1/1,66.

The valve opens when the pressure acting either on area A_1 (flow from A to B) or on area A_2 (flow from B to A) is higher than the pressure acting on area A_3 (added to the spring load value).

- **P type:** this valve is used for pressure control.

In this case the areas A_1 and A_3 are equivalent (area ratio 1:1) and the valve enables the flow direction from A to B only.

1 - IDENTIFICATION CODE FOR CARTRIDGE VALVES

Cartridge valve

Shutter type:
(area ratio A_1 / A_3):
QS = flow rate control (1:1,66)
QD = flow rate control with damping
nose (1:1,66)
PS = pressure control (1:1)

Seals:
NBR seals for mineral oil

20 - for ND 16, 25, 32, 40 and 50
21 - for ND 63
(the overall and mounting dimensions
remain unchanged from 20 to 29)

Nominal cracking pressure on section A1:
0.5 = 0,5 bar
1 = 1 bar (for ND 63 only)
2 = 2 bar (not available for ND 63)
4 = 4 bar
(other cracking pressure values available
on request)

AVAILABLE NOMINAL SIZES						VERSIONS	SYMBOL
16 ND16	25 ND25	32 ND32	40 ND40	50 ND50	63 ND63		
x	x	x	x	x		QS0.5	
x	x	x	x	x	x	QS2	
x	x	x	x	x		QD4	
					x	PS1	
x	x	x	x	x		PS2	

NOTE: The low leakage version is available for sizes 25, 32, 40, 50 and 63.
To order it, please add **/LL** as option at the end of the code.

2 - HYDRAULIC FLUIDS

Use mineral oil-based hydraulic fluids HL or HM type, according to ISO 6743-4. For these fluids, use NBR seals. For fluids HFDR type (phosphate esters) use FPM seals (code V). For the use of other kinds of fluid such as HFA, HFB, HFC, please consult our technical department. Using fluids at temperatures higher than 80 °C causes a faster degradation of the fluid and of the seals characteristics. The fluid must be preserved in its physical and chemical characteristics.

3 - TECHNICAL CHARACTERISTICS (cartridge valve with control cover)

Max operating pressure LC cartridge valve	bar	420
Max operating pressure limit of cover type DP*, DPE*, DF1, DF2, LCM	bar	350
Max operating pressure with distributor installed on cover	See technical characteristics of the distributor	
Ambient temperature range	°C	-20 / +50
Fluid temperature range	°C	-20 / +80
Fluid viscosity range	cSt	10 ÷ 400
Fluid contamination degree	According to ISO 4406:1999 class 20/18/15	
Recommended viscosity	cSt	25

8 - FUNCTIONAL DIAGRAMS

8.1 - R cover for directional control and check valve function with external pilot X

Functional diagrams	Description
	Piloting of the cartridge valve through the X port, available on the mounting surface or with pipe connection 1/4" BSP. For ND 40 and ND 50 sizes, the external piloting function can be realised by using control cover type D, with blanking plate code 1950751 (to be ordered separately).

8.2 - D cover for directional control and check valve function

Functional diagrams	Description
	Piloting of the cartridge valve by means of solenoid valve type DS3-TA (to be ordered separately - see catalogue 41 150) - solenoid valve OFF = A B intercepted flow - solenoid valve ON = A B free flow

8.3 - DZ cover for directional control with possibility to pilot other cartridges in line

Functional diagrams	Description
	The DZ cover enables the piloting of its cartridge valves and also of other valves connected to Z1 and Z2 pilot lines. The solenoid valve type DS3-S10 must be ordered separately (see catalogue 41 150).

8.4 - DF1 cover for directional control and check function with double pilot line

Functional diagrams	Description
	The DF1 cover gives the possibility of a double pilot line through X and Z1 ports. The solenoid valve type DS3-TA must be ordered separately (see catalogue 41 150). - solenoid valve OFF = A B intercepted flow - solenoid valve ON = A → B free flow , B → A intercepted (if pilot line X is connected with B and if Z1 is connected with A).

8.5 - DF2 cover for directional control and check function with priority piloting from two external lines

Functional diagrams	Description
	The cartridge valve can be simultaneously piloted from X and Z1 lines. The shuttle valve, integrated in the cover, enables the automatic selection of the pilot line which has the higher pressure (priority line). The solenoid valve type DS3-TA must be ordered separately (see catalogue 41 150). - solenoid valve OFF = A B intercepted flow - solenoid valve ON = A B free flow

8.6 - Q cover for flow control function

Functional diagrams	Description
	Flow control function by means of cover with stroke limiter. For a better flow control and to avoid the wear of the valve seat, this cover is normally used with a QD4 cartridge type.

8.7 - DP* cover for pressure control function

Functional diagrams	Description
	Pressure control function with a built-in relief valve. - max. adjustment pressure DP4 = 140 bar - DP6 = 350 bar The top blanking plate code 1950591 must be ordered separately.
	Pressure control function with electrical unloading by means of DS3-SA2 solenoid valve (to be ordered separately - see catalogue 41 150). - solenoid valve OFF = unloading at minimum pressure - solenoid valve ON = pressure controlled by the built-in relief valve.
	Pressure control function with electrical unloading and two step pressure by means of the solenoid valves DS3-S2 (to be ordered separately - see catalogue 41 150), MCI*-SAT/10 (for 16- 24 and 32 sizes - to be ordered separately) and MCD*-SAT (for 40 and 50 sizes to be ordered separately - see catalogue 61 200) - solenoid valve OFF = unloading at minimum pressure - solenoid valve ON side a = pressure controlled by the relief valve (MCI* or MCD*). - solenoid valve ON side b = pressure controlled by the relief valve integrated in the cover.

	Pressure control function with electrical control and three steps pressure by means of the solenoid valves DS3-S3 (to be ordered separately - see catalogue 41 150), MCI*-DT/10 (for 16- 24 and 32 sizes - to be ordered separately) and MCD*-DT/51 (for 40 and 50 sizes - to be ordered separately - see catalogue 61 200) - solenoid valve OFF = pressure controlled by the cover relief valve. - solenoid valve ON side a = pressure controlled by the relief valve on side b. - solenoid valve ON side b = pressure controlled by the relief valve on side a.
--	---

8.7 - DPE* cover for pressure control function

Functional diagram	Description
	Pressure control function by means of PRED3 proportional valve (to be ordered separately see catalogue 81 210). - Proportional valve OFF = unloading at minimum pressure - Proportional valve ON = proportional control of pressure

4	Identification label

5	Plug X: 1/4" BSP
6	Mounting surface ISO 4401-03 (CETOP 4.2-4-03-350)
7	Pressure control valve
8	Countersunk hex adjustment screw. Clockwise rotation to increase pressure 16, 25 and 32 = spanner 5 40 and 50 = spanner 6
9	Locking nut: 16, 25 and 32 = spanner 17 40 and 50 = spanner 19

NOTE: Fastening bolts class 12.9 UNI 5931 are recommended for the installation of the cover (to be ordered separately)

10 - MONITORED LOGIC ELEMENTS

Monitored logic elements are made of a directional function cartridge valve and a cover with built-in inductive proximity sensor. The PNP type sensor with closed contact states the condition of A - B intercepted flow.

10.1 - Identification code of monitored logic elements

10.2 - Characteristic Curves (values obtained with viscosity 36 cSt at 50°C)

10.3 - Functional diagram of cover D for directional control and check valve function

Functional diagram	Description
	Piloting of cartridge valve by means of solenoid valve type DS3-TA (to be ordered separately - see catalogue 41 150) - solenoid valve OFF = A → B intercepted flow - solenoid valve ON = A ↔ B free flow
	Piloting of cartridge valve by means of connection plate code 1950751 to be ordered separately.

10.4 - Functional diagrams for cover Z for directional control and piloting of other cartridges

Functional diagram	Description
	Piloting of cartridge valve by means of solenoid poppet valve type DT03-3A (to be ordered separately - see catalogue 42 200). ISO 4401-03 manifold type DN6 (cod.0294329) that allows to intercept the flow from two lines, obtaining a tight or the free flow. - solenoid valve OFF = sealing tight - A ↔ B locked flow - solenoid valve ON = flusso A ↔ B free flow
	Piloting of cartridge valve by means of connection plate code 1950751 to be ordered separately.

10.4 - OVERALL AND MOUNTING DIMENSIONS OF MONITORED LOGIC ELEMENTS

1	N. 4 fastening bolts (NOTE): 16 = M8x30 32 = M16x45 25 = M12x35 40 = M20x60
2	n° 3 sealing rings 90 Shore : 16 = OR type 2025 (6.07x1.78) (on version D there are 2 OR only) 25 and 32 = OR type 2037 (9.25x1.78) 40 = OR type 2050 (12.42x1.78)
3	Locating pin: 16 = Ø3x10 25, 32 and 40 = Ø5x14
4	Identification label
5	Mounting surface ISO 4401-03 (CETOP 4.2-4-03-350)
6	Proximity sensor
7	Connector for proximity sensor (to be ordered separately see par. 10.6)
8	Cartridge valve always supplied with the cover

NOTE1: Fastening bolts class 12.9 UNI 5931 are recommended for cover installation (to be ordered separately).

NOTE2: for cartridge valve seat dimensions see par. 5

10.5 - Technical characteristics of proximity sensor and relevant connector

PROXIMITY SENSOR

PNP TYPE

Rated voltage	V DC	24
Power supply voltage range	V DC	10 ÷ 30
Absorbed current	mA	200
Output	normally open contact	
Electric protection	polarity inversion short circuit overvoltage	
Electric connection	with connector	
Max operating pressure	bar	350
Operating temperature range	°C	-25 / +80
Class of protection according to CEI EN 60529 standards (atmospheric agents)		IP68
Spool position LED (NOTE)		NO

NOTE: The led is placed in the connector and its light is YELLOW.

valve closed = closed contact (A↔B intercepted flow)
valve open = open contact (A↔B free flow)

ELECTRIC CONNECTOR (to be ordered separately)

code: ECM3S / M12L / 10

Connector: pre-wired connector M12 - IP68

cable: with 3 conductors 0.34 mm² - length 5 mt - cable material: polyurethane resin (oil resistant)

LEDS:

GREEN LED: show the presence of power supply voltage to the connector. If the LED is off, the connector is not supplied.

YELLOW LED: show the valve condition:

- valve at rest yellow LED on - green LED on

- switched valve yellow LED off - green LED off
